

## Enquête annuelle marché des TIC

The “Information Technologies Market” observatory presents the results of the annual survey on the evolution. The studies are published in an Executive summary format and are available in three languages, Arabic, French and English.

### Study description

Each year the observatory publishes the results of the annual ICT indicators on households and businesses collection survey.

Objectives:

- Complete the information collected from operators and address issues of use and behaviour on information technologies in order to analyse qualitative aspects such as drivers or obstacles to equipment and use;
- Promote accurate and quantitative knowledge on the status and trends in the information society in Morocco;
- Establish a national communication medium;
- Supply international databases.

This publication is structured around the analysis of the access and use of households and businesses of fixed and mobile telephony, internet, and information technologies.
